Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2015/830. - United Kingdom (UK)

## SAFETY DATA SHEET

**Intercryl 588 Dark Grey** 

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

#### 1.1 Product identifier

: Intercryl 588 Dark Grey

Product name Product code

: WDA586

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses	
Professional application of coatings and inks	
Uses advised against	Reason
All Other Uses	

#### **1.3 Details of the supplier of the safety data sheet**

	-
International Paint Ltd.	
Stoneygate Lane	
Felling	
Gateshead	
Tyne and Wear	
NE10 0JY UK	
Tel: +44 (0)191 469 6111	Fax: +44 (0)191 438 3711
e-mail address of person responsible for this SDS	: sdsfellinguk@akzonobel.com
National contact	

#### 1.4 Emergency telephone number

National advisory body/Po	ison Centre (For use only by licensed medical professionals.)
Telephone number	: +44 (0)844 892 0111
<u>Supplier</u>	
Telephone number	: +44 (0)191 469 6111 (24H)

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Sens. 1, H317

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements Hazard pictograms

07/05/2017

1/13

### **SECTION 2: Hazards identification**

Signal word	Warning	
Hazard statements	May cause an allergic skin reaction.	
Precautionary statements		
Prevention	Wear protective gloves. Avoid breathing vapour. Contaminated work clothing should not be allowed out of the workplace.	
Response	IF ON SKIN: Wash with plenty of soap and water. Take off contaminated cloth and wash it before reuse. If skin irritation or rash occurs: Get medical attention	-
Storage	Not applicable.	
Disposal	Dispose of contents and container in accordance with all local, regional, national and international regulations.	al
Hazardous ingredients	1,2-benzisothiazol-3(2H)-one reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol-3-one [EC no. 220-239-6] (3:1)	d
Supplemental label elements		
	Wear appropriate respirator when ventilation is inadequate.	
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	Not applicable.	

X.International.

2.3 Other hazards Other hazards which do : None known. not result in classification

### **SECTION 3: Composition/information on ingredients**

Product/ingredient name	Identifiers	% by weight	<u>Classification</u> Regulation (EC) No. 1272/2008 [CLP]	Nota (s)	Туре

### **SECTION 3: Composition/information on ingredients**

no. 220-239-6] (3:1)	Aquatic Chronic 1, H410 (M=1)	
	See Section 16 for the full text of the H statements declared above.	

**X**International

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

	Nota (s)
SECTION 4: First aid measures	

#### 4 1 Description of first aid measures

easures
<ul> <li>In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice.</li> </ul>
<ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>
: Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.
<ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>
<ul> <li>If swallowed, seek medical advice immediately and show the container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>
: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

#### 4.2 Most important symptoms and effects, both acute and delayed

#### Potential acute health effects

· · · · · · · · · · · · · · · · · · ·	
Eye contact	: No known significant effects or critical hazards.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: May cause an allergic skin reaction.
Ingestion	: No known significant effects or critical hazards.
Over-exposure signs/sympto	oms
Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: irritation redness
Ingestion	: No specific data.

#### 4.3 Indication of any immediate medical attention and special treatment needed

+.5 mulcation of any mined	nate medical attention and special treatment needed	
Notes to physician	<ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.</li> </ul>	ļ
Specific treatments	: No specific treatment.

## **X**.International.

### **SECTION 5: Firefighting measures**

5.1 Extinguishing media Suitable extinguishing	e an extinguishing agent suitable for the surrounding fire.	
media		
Unsuitable extinguishing media	ne known.	
5.2 Special hazards arising fi	e substance or mixture	
Hazards from the substance or mixture	a fire or if heated, a pressure increase will occur and the container may bur	rst.
Hazardous thermal decomposition products	ecomposition products may include the following materials: rbon dioxide rbon monoxide etal oxide/oxides	
5.3 Advice for firefighters		
Special protective actions for fire-fighters	omptly isolate the scene by removing all persons from the vicinity of the incere is a fire. No action shall be taken involving any personal risk or without itable training.	
Special protective equipment for fire-fighters	e-fighters should wear appropriate protective equipment and self-contained eathing apparatus (SCBA) with a full face-piece operated in positive pressu ode. Clothing for fire-fighters (including helmets, protective boots and glove nforming to European standard EN 469 will provide a basic level of protecti emical incidents.	ıre es)

### **SECTION 6: Accidental release measures**

Version : 3

#### 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and material for	со	ntainment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.
6.4 Reference to other sections	:	See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.
Date of issue/Date of revision		: 07/05/2017 AkzoNobel

4/13

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Protective measures	<ul> <li>Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.</li> </ul>
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### 7.3 Specific end use(s)

Recommendations	: Not available.
Industrial sector specific solutions	: Not available.

#### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

No exposure limit value known.

**Recommended monitoring procedures** If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available

#### 8.2 Exposure controls

5/13

### **SECTION 8: Exposure controls/personal protection**

-						
Appropriate engineering controls		general ventilation should be sufficient to control worker exposure to airborne minants.				
Individual protection measures						
Hygiene measures	before Appro Conta conta	hands, forearms and face thoroughly after handling chemical products, e eating, smoking and using the lavatory and at the end of the working period. opriate techniques should be used to remove potentially contaminated clothing. Iminated work clothing should not be allowed out of the workplace. Wash minated clothing before reusing. Ensure that eyewash stations and safety ers are close to the workstation location.				
Eye/face protection	asses gases unles	y eyewear complying with an approved standard should be used when a risk sment indicates this is necessary to avoid exposure to liquid splashes, mists, or dusts. If contact is possible, the following protection should be worn, s the assessment indicates a higher degree of protection: safety glasses with shields.				
Skin protection						
Hand protection	again gloves protect 374) i protect accor of typ into a asses and d workp handl protect specif	hemical resistant gloves classified under Standard EN 374: Protective gloves st chemicals and micro-organisms. Recommended: Viton® or Nitrile s. When prolonged or frequently repeated contact may occur, a glove with a ction class of 6 (breakthrough time greater than 480 minutes according to EN s recommended. When only brief contact is expected, a glove with a ction class of 2 or higher (breakthrough time greater than 30 minutes ding to EN 374) is recommended. The user must check that the final choice e of glove selected for handling this product is the most appropriate and takes ccount the particular conditions of use, as included in the user's risk sment. NOTICE: The selection of a specific glove for a particular application uration of use in a workplace should also take into account all relevant blace factors such as, but not limited to: Other chemicals which may be ed, physical requirements (cut/puncture protection, dexterity, thermal ction), potential body reactions to glove materials, as well as the instructions/ fications provided by the glove supplier. Barrier creams may help to protect sposed areas of the skin but should not be applied once exposure has red.				
Body protection	being	nal protective equipment for the body should be selected based on the task performed and the risks involved and should be approved by a specialist handling this product.				
Other skin protection	select	priate footwear and any additional skin protection measures should be ed based on the task being performed and the risks involved and should be ved by a specialist before handling this product.				
Respiratory protection	stand must	properly fitted, air-purifying or air-fed respirator complying with an approved ard if a risk assessment indicates this is necessary. Respirator selection be based on known or anticipated exposure levels, the hazards of the product ne safe working limits of the selected respirator.				
Environmental exposure controls	ensur In sor	sions from ventilation or work process equipment should be checked to e they comply with the requirements of environmental protection legislation. ne cases, fume scrubbers, filters or engineering modifications to the process ment will be necessary to reduce emissions to acceptable levels.				

### **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

<u>Appearance</u>	
Physical state	: Liquid.
Colour	: Grey.
Odour	: Odourless.
Odour threshold	: Not available.
рН	: Not applicable.
Melting point/freezing point	: Not available.
Initial boiling point and boiling range	: Lowest known value: 100°C (212°F) (water).

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

<u>Product</u>	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	: The classification of the product may meet the criteria for a hazardous waste.
Packaging	
Methods of disposal	<ul> <li>Dispose of containers contaminated by the product in accordance with local or national legal provisions. This material and its container must be disposed of as hazardous waste. Dispose of via a licensed waste disposal contractor.</li> </ul>
Special precautions	: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### **SECTION 16: Other information**

IMPORTANT NOTE: the information contained in this data sheet (as may be amended from time to time) is not intended to be exhaustive and is presented in good faith and believed to be correct as of the date on which it is prepared. It is the user's responsibility to verify that this data sheet is current prior to using the product to which it relates.

Persons using the information must make their own determinations as to the suitability of the relevant product for their purposes prior to use. Where those purposes are other than as specifically recommended in this safety data sheet, then the user uses the product at their own risk.

MANUFACTURER'S DISCLAIMER: the conditions, methods and factors affecting the handling, storage, application, use and disposal of the product are not under the control and knowledge of the manufacturer. Therefore the manufacturer does not assume responsibility for any adverse events which may occur in the handling, storage, application, use, misuse or disposal of the product and, so far as permitted by applicable law, the manufacturer expressly disclaims liability for any and all loss, damages and/or expenses arising out of or in any way connected to the storage, handling, use or disposal of the product. Safe handling, storage, use and disposal are the responsibility of the users. Users must comply with all applicable health and safety laws.

Unless we have agreed to the contrary, all products are supplied by us subject to our standard terms and conditions of business, which include limitations of liability. Please make sure to refer to these and / or the relevant agreement which you have with AkzoNobel (or its affiliate, as the case may be). © AkzoNobel
