

Safety Data Sheet

QHA027/D INTERZINC 22 PART B

Version No 5 Revision Date 05/22/17

1. Product and company identification

1.1. Product identifier INTERZINC 22 PART B

Product Code QHA027/D

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use Anticorrosive primer

For professional use only.

Application Method Refer Technical Data Sheet.

1.3. Details of the supplier of the safety data sheet

Importer or

Manufacturer International Paint (Korea) Limited

(8-6B/L Chilseo Industrial Complex),

626-6 Gyenae-Ri,

Chilseo-Myeon, Haman-Gun,

Gyeongsangnam-Do

Korea

Telephone No. 055-632-6286(R&D), 055 586 2310(Fact **Fax No.** 055 632-6287(R&D), 055 587 6276(Fact

1.4. Emergency telephone number (24 hour) 055-586-2310(Factory)

For Poisons Advice telephone 055-586-2310(Factory) For Advice to Doctors &

Hospitals only

2. Hazard identification of the product

2.1. Classification of the substance or mixture

Acute Tox. 4;H332 Harmful if inhaled.

Aquatic Chronic 1;H410 Very toxic to aquatic life with long lasting effects.

2.2. Label elements

Using the Toxicity Data listed in section 11 & 12 the product is labelled as follows.

Warning

H332 Harmful if inhaled.

H410 Very toxic to aquatic life with long lasting effects.

[Prevention]:

P261 Avoid breathing dust / fume / gas / mist / vapours / spray.

P271 Use only outdoors or in a well-ventilated area.

P273 Avoid release to the environment.

[Response]:

P304+312 IF INHALED: Call a POISON CENTER or doctor / physician if you feel unwell.

P340 Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P391 Collect spillage.

[Storage]:

[Disposal]:

P501 Dispose of contents / container in accordance with local / national regulations.

2.3. Other hazards

This product contains no PBT/vPvB chemicals.

3. Composition/information on ingredients

This product contains the following hazardous substances.

Ingredient/Chemical Designations	Weight %	GHS Classification	Notes
Zinc Dust CAS Number: 0007440-66-6	>90	Water react. 1;H260 Pyr. Sol. 1;H250 Aquatic Acute 1;H400 Aquatic Chronic 1;H410	[1]
Zinc oxide CAS Number: 0001314-13-2	2.5- <5	Aquatic Acute 1;H400 Aquatic Chronic 1;H410	[1][2]
Trade secret	<1		

^[1] Substance classified with a health or environmental hazard.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence do not require reporting in this section.

Common Names

0007440-66-6 (Zinc Dust) 0001314-13-2 (Zinc oxide)

4. First aid measures

4.1. Description of first aid measures

General

In all cases of doubt, or when symptoms persist, seek medical attention.

Never give anything by mouth to an unconscious person.

Inhalation

Not expected to be acutely toxic by inhalation.

All dusts are irritants, therefore inhalation of dusts should be avoided. Exposures to high dust concentrations may cause irritation to the mucous membrane of the respiratory system and the eyes. Symptoms may include reddening, swelling, itching, weeping, sneezing and coughing.

Wash out nose and mouth with water. Remove to fresh air if any effects apparent. Seek medical attention if any effects persist.

^[2] Substance with a workplace exposure limit.

^[3] PBT-substance or vPvB-substance.

^{*}The full texts of the Hazard (H) phrases are shown in Section 16.

Skin Contact

Skin contact may cause mild irritation. Prolongued and/or repeated contact may lead to irritant contact dermatitis.

Wash effected areas with soap and water. Seek medical attention if irritation persists.

Eye Contact

Expected to cause no more than minor eye irritation. Dust in the eyes may cause irritation or corneal injury due to mechanical action.

Irrigate copiously with clean fresh water for 10 minutes, holding eyelids apart. Seek medical attention if irritation persists.

Ingestion

Moderately toxic when ingested.

Thoroughly rinse mouth with clean water.

If swallowed DO NOT induce vomiting. Give a glass of water to achieve effective dilution. Seek medical attention.

4.2. Most important symptoms and effects, both acute and delayed

No data available

4.3. Indication of any immediate medical attention and special treatment needed and notes for physician

No data available

5. Fire-fighting measures

5.1. Extinguishing media

This product is combustible.

Material will burn, emitting carbon oxide combustion products.

Possibility of dust explosions, depending on the dust concentration in the air and ignition sources present.

Recommended extinguishing media; water spray, foam (large fires) - CO2, powder (small fires). When entering enclosed areas, wear self contained breathing apparatus.

Do not allow contaminants and water from fire fighting to enter drains or water courses.

5.2. Special hazards arising from the substance or mixture

Fire will produce dense black smoke. Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

Avoid exposure and use breathing apparatus as appropriate.

5.3. Advice for fire-fighters

Cool closed containers exposed to fire by spraying them with water. Do not allow run off water and contaminants from fire fighting to enter drains or water courses.

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Wear protective equipment as listed in Section 8 during clean up operations.

6.2. Environmental precautions

Do not allow spills to enter drains or watercourses.

6.3. Methods and material for containment and cleaning up

Vacuum spills to keep dust down, do not sweep. Ventilate area.

Do not allow into water courses.

If drains, sewers, streams or lakes are contaminated contact the relevant Environment Protection Agency or local authority.

7. Handling and storage

7.1. Precautions for safe handling

Handling

Handle carefully as the powder is very fine and can spread. Handlers of powders should wash hands and face prior to meals and smoking.

In Storage

Handle containers carefully to prevent damage and spillage.

Naked flames and smoking should not be permitted in storage areas. It is recommended that fork lift trucks and electrical equipment are protected to the appropriate standard.

7.2. Conditions for safe storage, including any incompatibilities

Keep away from the following materials: oxidising agents, strong alkalis, strong acids.

Store in a cool dry area (below 25C), away from heat, sparks and open flame.

Keep containers sealed when not in use.

Store out of direct sunlight.

There are no exposure scenarios, see details in section 1.

7.3. Specific end use(s)

Avoid skin and eye contact. Avoid inhalation of dust. Observe label precautions. Use personal protection equipment as shown in section 8.

Smoking, eating and drinking should be prohibited in all preparation and application areas.

8. Exposure controls and personal protection

8.1. Control parameters

Exposure standards are those provided by the ACGIH (American Conference of Government Industrial Hygenists).

Material	Short term (15 min. ave)		Long term (8hr time weighted average)		Comments
	ppm	mg/m³	ppm	mg/M3	
Zinc Dust				10	
Zinc oxide		10		5	

Key to notification

- (P) Peak exposure limit
- (R) Suppliers Recommended Limit
- (Sk) There is a risk of absorption through unbroken skin

(Sen) Sensitiser

- (Cat1) Category 1 established human carcinogen
- (Cat2) Category 2 probable human carcinogen
- (Cat3) Category 3 substances suspected of having carcinogenic potential

DNEL/PNEC values

No Data Available

8.2. Exposure controls

Good housekeeping is required to keep airbourne dusts to a minimum to avoid the possibility of dust explosions. Take care to clean down all horizontal surfaces where dust can accumulate. Ensure all equipment is correctly earthed.

Use local exhaust ventilation and / or general ventilation to maintain dust levels below the recommended exposure limits. Exhaust ventilation is required at the point of application. This should be sufficient to maintain levels below the recommended exposure standards.

Application of this product should be in accordance with AS/NZS3754 (Safe Application of Powder Coatings by Electrostatic Spraying).

Eye Protection

Wear safety glasses with side shields to protect the eyes. An eye wash station is suggested as a good workplace practice.

Skin Protection

Wear PVC or rubber gloves.

Other

Wear overalls to keep skin contact to a minimum. Users of this product may also consider using hoods or balaclava's to protect the face.

Respiratory Protection

In ventilated areas and spray booths that will maintain exposure levels below the recommended limits - no respiratory equipment is required.

If exposed to dust, wear a dust mask or cartridge respirator fitted with a dust cartridge. In confined areas, use an approved air line respirator or hood.

Refer to AS/NZS1715 Selection, use and maintenance of repiratory protection devices.

Thermal hazards

No Data Available

9. Physical and chemical properties

Appearance Grey Powder
Odour No smell
Odour threshold Not Measured

pH N/A

Melting point / freezing point (°C)

Not Measured

Initial boiling point and boiling range (°C)

Flash Point (C) 999

Evaporation rate (Ether = 1) Not Measured Flammability (solid, gas) Not Applicable

Upper/lower flammability or explosive limits Lower Explosive Limit: No data available

Upper Explosive Limit: No data available

Vapour pressure (Pa)Not MeasuredVapour DensityHeavier than air.

Specific Gravity
7.10
Solubility in Water
Partition coefficient n-octanol/water (Log Kow)
Autoignition temperature (°C)
Not Measured
Decomposition temperature
Not Measured

Viscosity (cSt) N/A

9.2. Other information

No further information

10. Stability and reactivity

10.1. Reactivity

No data available

10.2. Chemical stability

This product is stable under normal storage and handling conditions (see section 7). When exposed to very high temperatures, may produce hazardous decomposition products such as carbon monoxide, oxides of nitrogen and smoke.

10.3. Possibility of hazardous reactions

May react exothermically with: oxidising agents, strong alkalis, strong acids.

10.4. Conditions to avoid

Stable under recommended storage and handling conditions (see section 7).

10.5. Incompatible materials

Keep away from the following materials: oxidising agents, strong alkalis, strong acids.

10.6. Hazardous decomposition products

Fire will produce dense black smoke. Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

Avoid exposure and use breathing apparatus as appropriate.

11. Toxicological information

Acute toxicity

Exposure to solvent vapour concentrations from the component solvents in excess of the stated occupational exposure limits may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, nausea, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness.

Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in dryness, irritation and possible non-allergic contact dermatitis. Solvents may also be absorbed through the skin. Splashes of liquid in the eyes may cause irritation and soreness with possible reversible damage.

The preparation has been assessed using the Acute Toxicity Data listed below, and classified for toxicological hazards accordingly. See section 2 for details.

Ingredient	Oral LD50, mg/kg	Skin LD50, mg/kg	Inhalation Vapour LD50, mg/L/4hr	Inhalation Dust/Mist LD50, mg/L/4hr
Zinc Dust - (7440-66-6)	Not Available	Not Available	Not Available	Not Available
Zinc oxide - (1314-13-2)	5,000.00, Rat	Not Available	Not Available	2.50, Mouse

Item	Category	Hazard
Acute Toxicity (mouth)	Not Classified	Not Applicable
Acute Toxicity (skin)	Not Classified	Not Applicable
Acute Toxicity (inhalation)	4	Harmful if inhaled.
		

Skin corrosion/irritation	Not Classified	Not Applicable
Eye damage/irritation	Not Classified	Not Applicable
Sensitization (respiratory)	Not Classified	Not Applicable
Sensitization (skin)	Not Classified	Not Applicable
Germ toxicity	Not Classified	Not Applicable
Carcinogenicity	Not Classified	Not Applicable
Reproductive Toxicity	Not Classified	Not Applicable
Specific target organ systemic toxicity (single exposure)	Not Classified	Not Applicable
Specific target organ systemic Toxicity (repeated exposure)	Not Classified	Not Applicable
Aspiration hazard	Not Classified	Not Applicable

12. Ecological information

12.1. Toxicity

The preparation has been assessed according to the GHS criteria and is classified as dangerous for the environment, using the toxicity data listed below.

There are no data available on the product itself.

The product should not be allowed to enter drains or water courses.

Aquatic Ecotoxicity

Ingredient	96 hr LC50 fish, mg/l	48 hr EC50 crustacea, mg/l	ErC50 algae, mg/l
Zinc Dust - (7440-66-6)	0.182, Oncorhynchus tshawytscha	0.068, Daphnia magna	0.106 (72 hr), Pseudokirchneriella subcapitata
Zinc oxide - (1314-13-2)	1.10, Oncorhynchus mykiss		0.042 (72 hr), Pseudokirchneriella subcapitata

12.2. Persistence and degradability

There is no data available on the preparation itself.

12.3. Bioaccumulative potential

Not Measured

12.4. Mobility in soil

No data available

12.5. Results of PBT and vPvB assessment

This product contains no PBT/vPvB chemicals.

12.6. Other adverse effects

No data available

13. Disposal considerations

13.1. Waste treatment methods

Vacuum spills to keep dust down, do not sweep.

Do not allow into drains or watecourses.

As waste regulations vary, use information provided in this data sheet to obtain advice from the local Waste Regulation Authority.

14. Transport information

14.1. UN number 3077

14.2. UN proper shipping name Environmentally Hazardous Substance, Solid, N.O.S. (Zinc OR

Zinc Oxide)

14.3. Transport hazard class(es)

Road and Rail Transport UN3077, Environmentally Hazardious Substance, Solid, N.O.S,

contains (Zinc or Zinc Oxide), CLASS 9, PG III, HAZCHEM 2Z

IMDG Class/Div 9 Sub Class

reference:

16. Other information

Revision Date: 05/22/2017

Version: 5

Initial Date: 05/07/2010

This Safety Data Sheet was compiled with data and information from the following sources: KOSHA, NITE, ESIS, NLM, SIDS, IPCS, NCIS.

The information on this SDS is based upon the present state of our knowledge and on current law. The product should not be used for purposes other than shown in the product data sheet without first obtaining written advice.

It is always the responsibility of the user to take all necessary steps to meet the demands of applicable legislation.

The information in this Safety Data Sheet is required according to legislation.

The full text of the phrases appearing in section 3 is:

H250 Catches fire spontaneously if exposed to air.

H260 In contact with water releases flammable gases which may ignite spontaneously.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

This SDS is valid for 5 years from the revised date on page 1. The revision date is in American format (e.g. MM/DD/YY).

End of document

the accuracy of and/or sufficiency of such information.
