

SAFETY DATA SHEET

Intercryl 700 Base Medium

Section 1. Identification

Intercryl 700 Base Medium : GHS product identifier
 QYA120 : Product code

| Identified uses | |
|---|--------|
| Professional application of coatings and inks | |
| Uses advised against | Reason |
| All Other Uses | |

International Farg AB : Supplier's details
 Holmedalen 3
 Asperedes Industriomrade
 SE-424 22 Angered
 Sweden

Tel: +46 (0) 31 928500 Fax: +46 (0) 31 928530

+46 8 33 12 31 : Emergency telephone number (with hours of operation)
 +966 55 388 0087 : National advisory body/ Poison Centre (For use only by licensed medical professionals.)
 sdsfellinguk@akzonobel.com : e-mail address of person responsible for this SDS

Section 2. Hazards identification

SKIN SENSITIZATION - Category 1 : Classification of the substance or mixture
 TOXIC TO REPRODUCTION (Unborn child) - Category 2

GHS label elements

: Hazard pictograms

Warning : Signal word
 May cause an allergic skin reaction. : Hazard statements
 Suspected of damaging the unborn child.

Precautionary statements

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Avoid breathing vapour. Contaminated work clothing should not be allowed out of the workplace. : Prevention
 IF exposed or concerned: Get medical attention. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation or rash occurs: Get medical attention. : Response
 Store locked up. : Storage

Section 2. Hazards identification

| | |
|---|---|
| Dispose of contents and container in accordance with all local, regional, national and international regulations. | : Disposal |
| Wear appropriate respirator when ventilation is inadequate. | : Supplemental label elements |
| None known. | : Other hazards which do not result in classification |

Section 3. Composition/information on ingredients

Mixture : Substance/mixture

| Classification | CAS number | % by weight | Ingredient name |
|---|------------|-------------|---|
| Flam. Liq. 4, H227 Acute Tox. 5, H303 Acute Tox. 5, H313 Eye Irrit. 2A, H319 | 112-34-5 | ≤3 | 2-(2-butoxyethoxy)ethanol |
| Flam. Liq. 4, H227 Eye Irrit. 2A, H319 Repr. 2, H361 (Unborn child) | 111-77-3 | <1 | 2-(2-methoxyethoxy)ethanol |
| Skin Corr. 1B, H314 STOT SE 3, H335 Aquatic Acute 1, H400 | 1336-21-6 | <0.25 | ammonia |
| Acute Tox. 3, H301 | 55965-84-9 | <0.06 | reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol-3-one [EC no. 220-239-6] (3:1) |
| Acute Tox. 3, H311 Acute Tox. 3, H331 Skin Corr. 1B, H314 Skin Sens. 1, H317 Aquatic Acute 1, H400 Aquatic Chronic 1, H410 | | | |

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

| | |
|--|----------------|
| Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs. | : Eye contact |
| Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. | : Inhalation |
| Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse. | : Skin contact |

Section 4. First aid measures

Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

: Ingestion

Most important symptoms/effects, acute and delayed

Potential acute health effects

No known significant effects or critical hazards. : Eye contact
 No known significant effects or critical hazards. : Inhalation
 May cause an allergic skin reaction. : Skin contact
 No known significant effects or critical hazards. : Ingestion

Over-exposure signs/symptoms

No specific data. : Eye contact
 Adverse symptoms may include the following: : Inhalation
 reduced foetal weight
 increase in foetal deaths
 skeletal malformations
 Adverse symptoms may include the following: : Skin contact
 irritation
 redness
 reduced foetal weight
 increase in foetal deaths
 skeletal malformations
 Adverse symptoms may include the following: : Ingestion
 reduced foetal weight
 increase in foetal deaths
 skeletal malformations

Indication of immediate medical attention and special treatment needed, if necessary

Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. : Notes to physician
 No specific treatment. : Specific treatments
 No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. : Protection of first-aiders
 Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Firefighting measures

Extinguishing media

Use an extinguishing agent suitable for the surrounding fire. : Suitable extinguishing media
 None known. : Unsuitable extinguishing media
 In a fire or if heated, a pressure increase will occur and the container may burst. : Specific hazards arising from the chemical

Section 5. Firefighting measures

| | |
|---|---|
| Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides metal oxide/oxides | : Hazardous thermal decomposition products |
| Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. | : Special protective actions for fire-fighters |
| Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. | : Special protective equipment for fire-fighters |

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| | |
|---|--------------------------------------|
| No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. | : For non-emergency personnel |
| If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". | : For emergency responders |
| Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). | : Environmental precautions |

Methods and material for containment and cleaning up

| | |
|---|----------------------|
| Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. | : Small spill |
| Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. | : Large spill |

Section 7. Handling and storage

Precautions for safe handling

| | |
|--|------------------------------|
| Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. | : Protective measures |
|--|------------------------------|

Section 7. Handling and storage

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

: **Advice on general occupational hygiene**

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

: **Conditions for safe storage, including any incompatibilities**

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

| Exposure limits | Ingredient name |
|--|---------------------------|
| ACGIH TLV (United States, 3/2015). TWA: 10 ppm 8 hours. Form: Inhalable fraction and vapor | 2-(2-butoxyethoxy)ethanol |

If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

: **Appropriate engineering controls**

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

: **Environmental exposure controls**

Individual protection measures

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

: **Hygiene measures**

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

: **Eye/face protection**

Skin protection

Use chemical resistant gloves classified under Standard EN 374: Protective gloves against chemicals and micro-organisms. Recommended: Viton® or Nitrile gloves. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

: **Hand protection**

Section 8. Exposure controls/personal protection

Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

: **Body protection**

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

: **Other skin protection**

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

: **Respiratory protection**

Section 9. Physical and chemical properties

Appearance

Liquid.

: **Physical state**

Various

: **Colour**

Ammonia.

: **Odour**

Not available.

: **Odour threshold**

9

: **pH**

Not available.

: **Melting point**

Lowest known value: 100°C (212°F) (water).

: **Boiling point**

Closed cup: 101°C (213.8°F)

: **Flash point**

Not available.

: **Evaporation rate**

Not available.

: **Flammability (solid, gas)**

Not available.

: **Lower and upper explosive (flammable) limits**

Not available.

: **Vapour pressure**

Not available.

: **Vapour density**

1.18

: **Relative density**

Insoluble in the following materials: cold water.

: **Solubility**

Not available.

: **Partition coefficient: n-octanol/water**

Not available.

: **Auto-ignition temperature**

Not available.

: **Decomposition temperature**

Kinematic (room temperature): 170 mm²/s (170 cSt)

: **Viscosity**

Section 10. Stability and reactivity

No specific test data related to reactivity available for this product or its ingredients.

: **Reactivity**

The product is stable.

: **Chemical stability**

Under normal conditions of storage and use, hazardous reactions will not occur.

: **Possibility of hazardous reactions**

No specific data.

: **Conditions to avoid**

No specific data.

: **Incompatible materials**

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

: **Hazardous decomposition products**

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

| Exposure | Dose | Species | Result | Product/ingredient name |
|----------|------------|---------|-------------|---|
| - | 2700 mg/kg | Rabbit | LD50 Dermal | 2-(2-butoxyethoxy)ethanol ammonia reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol-3-one [EC no. 220-239-6] (3:1) |
| - | 4500 mg/kg | Rat | LD50 Oral | |
| - | 350 mg/kg | Rat | LD50 Oral | |
| - | 53 mg/kg | Rat | LD50 Oral | |

Irritation/Corrosion

| Observation | Exposure | Score | Species | Result | Product/ingredient name |
|-------------|-------------------------|-------|---------|--------------------------|---|
| - | 24 hours 20 milligrams | - | Rabbit | Eyes - Moderate irritant | 2-(2-butoxyethoxy)ethanol |
| - | 20 milligrams | - | Rabbit | Eyes - Severe irritant | |
| - | 24 hours 500 milligrams | - | Rabbit | Eyes - Mild irritant | 2-(2-methoxyethoxy)ethanol |
| - | 500 milligrams | - | Rabbit | Eyes - Moderate irritant | |
| - | 250 Micrograms | - | Rabbit | Eyes - Severe irritant | ammonia |
| - | 0.5 minutes | - | Rabbit | Eyes - Severe irritant | |
| - | 1 milligrams | - | Rabbit | Eyes - Severe irritant | reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one [EC no. 247-500-7] and 2-methyl-2H-isothiazol-3-one [EC no. 220-239-6] (3:1) |
| - | 0.01 Percent | - | Human | Skin - Severe irritant | |

Sensitisation

Not available.

Mutagenicity

Not available.

Carcinogenicity

Not available.

Reproductive toxicity

Not available.

Teratogenicity

Not available.

Specific target organ toxicity (single exposure)

| Target organs | Route of exposure | Category | Name |
|------------------------------|-------------------|------------|---------|
| Respiratory tract irritation | Not applicable. | Category 3 | ammonia |

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Section 11. Toxicological information

Not available. : Information on likely routes of exposure

Potential acute health effects

No known significant effects or critical hazards. : Eye contact
 No known significant effects or critical hazards. : Inhalation
 May cause an allergic skin reaction. : Skin contact
 No known significant effects or critical hazards. : Ingestion

Symptoms related to the physical, chemical and toxicological characteristics

No specific data. : Eye contact
 Adverse symptoms may include the following: : Inhalation
 reduced foetal weight
 increase in foetal deaths
 skeletal malformations
 Adverse symptoms may include the following: : Skin contact
 irritation
 redness
 reduced foetal weight
 increase in foetal deaths
 skeletal malformations
 Adverse symptoms may include the following: : Ingestion
 reduced foetal weight
 increase in foetal deaths
 skeletal malformations

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short term exposure

Not available. : Potential immediate effects
 Not available. : Potential delayed effects

Long term exposure

Not available. : Potential immediate effects
 Not available. : Potential delayed effects

Potential chronic health effects

Not available.
 Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. : General
 No known significant effects or critical hazards. : Carcinogenicity
 No known significant effects or critical hazards. : Mutagenicity
 Suspected of damaging the unborn child. : Teratogenicity
 No known significant effects or critical hazards. : Developmental effects
 No known significant effects or critical hazards. : Fertility effects

Numerical measures of toxicity

Acute toxicity estimates

| ATE value | Route |
|----------------|--------|
| 442125.6 mg/kg | Oral |
| 265275.3 mg/kg | Dermal |

Section 11. Toxicological information

Section 12. Ecological information

Toxicity

| Exposure | Species | Result | Product/ingredient name |
|----------|---------------------------------|-------------------------------------|----------------------------|
| 96 hours | Fish - Lepomis macrochirus | Acute LC50 1300000 µg/l Fresh water | 2-(2-butoxyethoxy)ethanol |
| 48 hours | Daphnia - Daphnia magna | Acute EC50 930 ppm Fresh water | 2-(2-methoxyethoxy)ethanol |
| 96 hours | Fish - Oncorhynchus mykiss | Acute LC50 960 ppm Fresh water | |
| 96 hours | Fish - Gambusia affinis - Adult | Acute LC50 15000 µg/l Fresh water | ammonia |

Persistence and degradability

Not available.

Bioaccumulative potential

| Potential | BCF | LogP _{ow} | Product/ingredient name |
|-----------|-----|--------------------|----------------------------|
| low | - | 1 | 2-(2-butoxyethoxy)ethanol |
| low | - | -0.47 | 2-(2-methoxyethoxy)ethanol |

Mobility in soil

Not available.

: Soil/water partition coefficient (K_{oc})

No known significant effects or critical hazards.

: Other adverse effects

Section 13. Disposal considerations

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

: Disposal methods

Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

| IATA | IMDG | UN | |
|----------------|----------------|----------------|----------------------------|
| Not regulated. | Not regulated. | Not regulated. | UN number |
| - | - | - | UN proper shipping name |
| - | - | - | Transport hazard class(es) |

Notice to reader

IMPORTANT NOTE: the information contained in this data sheet (as may be amended from time to time) is not intended to be exhaustive and is presented in good faith and believed to be correct as of the date on which it is prepared. It is the user's responsibility to verify that this data sheet is current prior to using the product to which it relates.

Persons using the information must make their own determinations as to the suitability of the relevant product for their purposes prior to use. Where those purposes are other than as specifically recommended in this safety data sheet, then the user uses the product at their own risk.

Section 16. Other information

MANUFACTURER'S DISCLAIMER: the conditions, methods and factors affecting the handling, storage, application, use and disposal of the product are not under the control and knowledge of the manufacturer. Therefore the manufacturer does not assume responsibility for any adverse events which may occur in the handling, storage, application, use, misuse or disposal of the product and, so far as permitted by applicable law, the manufacturer expressly disclaims liability for any and all loss, damages and/or expenses arising out of or in any way connected to the storage, handling, use or disposal of the product. Safe handling, storage, use and disposal are the responsibility of the users. Users must comply with all applicable health and safety laws.

Unless we have agreed to the contrary, all products are supplied by us subject to our standard terms and conditions of business, which include limitations of liability. Please make sure to refer to these and / or the relevant agreement which you have with AkzoNobel (or its affiliate, as the case may be).
