2. Hazard identification of the product

2.1. Classification of the substance or mixture Flam. Liq. 3;H226 Skin Irrit. 2;H315 Eye Irrit. 2;H319 Aquatic Acute 3;H402

2.2. Label elements Using the Toxicity Data listed in section 11 & 12 the product is labelled as follows.

H226 Flammable liquid and vapour.

H315 Causes skin irritation.

H319 Causes serious eye irritation.

H402 Harmful to aquatic life.

P210 Keep away from heat / sparks / open flames / hot surfaces - No smoking.

P260 Do not breathe mist / vapours / spray.

P262 Do not get in eyes, on skin, or on clothing.

P273 Avoid release to the environment.

P280 Wear protective gloves / eye protection / face protection.

P301+310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.

P302+352 IF ON SKIN: Wash with soap and water.

P303+361+353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P305+351+338 IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing.

P331 Do NOT induce vomiting.

P337+313 If eye irritation persists: Get medical advice / attention.

P362 Take off contaminated clothing and wash before reuse.

P370 In case of fire: Use water spray, fog, or regular foam..

P403+233 Store in a well ventilated place. Keep container tightly closed.

P501 Dispose of contents / container in accordance with local / national regulations.

3. Composition/information on ingredients

This product contains the following substances that present a hazard within the meaning of the relevant State and Federal Hazardous Substances regulations.

Ingredient/Chemical Designations	Weight %
Limestone	10 - 25
CAS Number: 0001317-65-3	
Xylenes (o-, m-, p- isomers)	10 - 25
CAS Number: 0001330-20-7	
Propylene glycol monomethyl ether acetate CAS Number: 0000108-65-6	1.0 - 10
Benzene, ethyl- CAS Number: 0000100-41-4	1.0 - 10

4.1. Description of first aid measures

General	Remove contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean or destroy contaminated shoes.
Inhalation	If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.
Eyes	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.
Skin	In case of contact, immediately flush skin with soap and plenty of water. Get medical attention immediately.
Ingestion	If swallowed, immediately contact Poison Control Center at 1-800-854-6813. DO NOT induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person.
4.2. Most important syn	nptoms and effects, both acute and delayed
Overview	NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. Avoid contact with eyes, skin and clothing.
Inholation	

4. First aid measures

Inhalation

	Harmful if inhaled. Causes nose and throat irritation. Vapors may affect the brain or			
-	nervous system causing dizziness, headache or nausea. Risk of serious damage to eyes. Do not get in eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 3 of			
Eyes				
	this document. Depending on the site-specific condition of use, safety glasses,			
	chemical goggles, and/or head and face protection may be required to prevent			
	contact. The equipment must be thouroughly cleaned, or discarded after each use.			
Skin	Causes skin irritation. May cause delayed skin irritation. May be harmful if absorbed			
Ingestion	through the skin. Harmful if swallowed. May cause abdominal pain, nausea, vomiting, diarrhea, or			
Ingestion	drowsiness.			
Chronic effects	Possible cancer hazard. Contains an ingredient which may cause cancer based on			
	animal data (See Section 2 and Section 15 for each ingredient). Risk of cancer			
	depends on duration and level of exposure.			
	5. Fire-fighting measures			
5.1. Extinguishing med				
Appropriate Extinguishing Methods	Water in form of fog, Co2, foam or dry chemical dust.			
Inappropriate	Direct water spray into fire			
Extinguishing Methods				
Specific Hazards	Can liberate toxic fumes or gases during the burning. For decomposition see section 10.			
5.2. Special hazards ar	rising from the substance or mixture			
Special Methods	Evacuate the area and to fight the fire at a safe distance upwind. Use water in fog to			
Special Methods	Evacuate the area and to fight the fire at a safe distance upwind. Use water in fog to cool containers near the fire. Keep runoff from entering sewer. Extinguishing water must be disposed according to local legislation.

Handle the packages with care in order to avoid damage and spillage.

Be aware of the precautions referred to on the label.

Avoid contact with the eyes and the skin. Avoid swallowing of vapor and the pulverizations. Be aware of the precautions referred to on the label. Use personal protection equipment according to the section 8. No smoking, drinking or eating in the application areas.

All the ignition sources (hot surfaces, sparks, unprotected flames, etc.) must be excluded from the areas of manufacturing and application. The storage areas, the preparation and the application must be well ventilated. The product can be carried electrostatically. Always use grounding cables when transferring solvents or product. The operators must use adequate outfits which shall not develop static current. (at least 60% of natural fiber) and anti-static shoes.

Solvents based products: The solvent vapors are heavier than the air and can concentrate on the floor and explosive mixtures may be formed with the air .

Water based products: It does not require special cares for not being inflammable or explosive. Use only the indicated personal protection equipments.

7.2. Conditions for safe storage, including any incompatibilities Store between 40-100F (4-38C).

8.2. Exposure controls

Respiratory Protection	Select equipment to provide protection from the ingredients listed in Section 3 of this document. Ensure fresh air entry during application and drying. If you experience eye watering, headache or dizziness or if air monitoring demonstrates dust, vapor, or mist levels are above applicable limits, wear an appropriate, properly fitted respirator (NIOSH approved) during and after application. Follow respirator manufacturer's directions for respirator use.
Eye and face protection	Avoid contact with eyes. Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 8 of this document. Depending on the site-specific conditions of use, safety glasses, chemical goggles, and/or head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.

Skin and body protection	Protective equipment should be selected to provide protection from exposure to the chemicals listed in Section 8 of this document. Depending on the site-specific conditions of use, protective gloves, apron, boots, head and face protection may be required to prevent contact. The equipment must be thoroughly cleaned, or discarded after each use.
Engineering Controls	Prevent build-up of vapors by opening all windows and doors to achieve cross-ventilation.
Special Precations	Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Use good personal hygiene practices. Wash hands before eating, drinking, using toilet facilities, etc. Promptly remove soiled clothing and wash clothing thoroughly before reuse. Shower after work using plenty of soap and water.

Soap and water.					
9. Physical and chemical properties					
Appearance	Red Liquid				
Odour threshold	Not Measured				
рН	No Established Limit				
Melting point / freezing point	Not Measured				
Initial boiling point and boiling range	100 (°C) 212 (°F)				
Flash Point	34 (°C) 93 (°F)				
Evaporation rate (Ether = 1)	Not Measured				
Flammability (solid, gas)	Not Applicable				
Upper/lower flammability or explosive limits Lower Explosive Limit: .8					
	Upper Explosive Limit: No Established Limit				
Vapour pressure (Pa)	Not Measured				
Vapor Density	Heavier than air				
Specific Gravity	1.12				
Solubility in Water	Not Measured				
Partition coefficient n-octanol/water (Log Kow)	Not Measured				
Auto-ignition temperature	Not Measured				
Decomposition temperature	Not Measured				
Viscosity (cSt)	No Established Limit Not Measured				
VOC %	Refer to the Technical Data Sheet or label where information is available.				

10.1. Reactivity

10. Stability and reactivity

10.1. Reactivity
Keep away from alkaline or strong strong acid to prevent probable exothermal reactions.
10.2. Chemical stability
This product is stable
10.3. Possibility of hazardous reactions
Dangerous Polymerization will not occur. Heat and vapors in excess can be generated when inproperly used.
10.4. Conditions to avoid
Keep away from alkaline or strong strong acid to prevent probable exothermal reactions. Strong oxidizing agents
10.5. Incompatible materials
Strong oxidizing agents
10.6. Hazardous decomposition products
Can liberate toxic vapors in the welding process. The vapors can produce Dioxide and Monoxide of Carbon.
11. Toxicological information

Acute toxicity

NOTICE: Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal. No additional information provided for this product. See Sections 3 and 8 for chemical specific data.
